Dawn of the robots ielts reading answer test 2 pdf printable full page

Thus, scientists have resorted to simpler alternatives: 'We have become much more pragmatic in our work,' says Nello Cristianini, Professor of Artificial Intelligence at the University of Bristol in England and associate editor of the Journal of Artificial Intelligence Research. And most importantly, it shows how the sciences of and Artificial Intelligence have progressed in recent years - a point highlighted by Bill Gates, the head of Microsoft who is a convert to these causes. Instead, we're looking for simpler solutions with basic sensors, for example.' This approach is exemplified by vacuum cleaner robots like the Electrolux Trilobite. Modern robots will take quite some time to match those we have created in books and books.23. Paragraph E; Line 4 22 A The fact is that we still have a way to go before the real robots catch up with their sci-fi logos' n/ says Gates. Human beings orient themselves with other objects in a room very easily. paragraph F; Line 1 & Line 4 20 C M Aquinas like these take researchers to the field of socialized: How make robots act in a way that doesn't scare or offend individuals. The robot then returns with the right dishes. Robots find the task almost impossible. However, here, each car has its onboard computer loaded with a digital map and route plans, and received instructions to negotiate busy roads; differentiate between pedestrians and stationary objects; determine whether other vehicles were stationary or in service; and handle various parking maneuvers, which the robots turn out to be unexpectedly practical. As it is, companies make toys that imitate pets and children with a growing sophistication. I can imagine a future in which the robotic devices become a part almost from our day to day," says Gates. This has until recently reduced robots to fairly static and cumbersome roles. For a long time, researchers tried to get around the problem by trying to recreate the problem. Then we can think about teaching them to interact with humans," Chrisley said. paragraph D; Lines 6 -7 18 i Ác Á We are no longer trying to recreate human functions. However, just three years earlier, in the previous DARPA driverless car race, each robot competitor - aimed at navigating through a stretch of open desert - crashes or seizes until before approaching the finish line.CIt is a remarkable transition has clear implications for the car of the future. A key difficulty is getting robots to know their place. The industry is developing in a very similar way to how the IT business does 30 years ago," he says. We have stopped trying to allow robots to perceive objects as humans do.22. Paragraph E; Line 7 26 touch screen Each one has a touch screen on which you can type orders. The Trilobite glides around the houses issuing ultrasound signals to create maps of the rooms, which are remembered for future cleaning. The ultimate goal is to provide the sick and the elderly with robotic home helpers, a key concern a country like JapÁ where 22% of the population 65 years or more. A Land Rover approached a car on the Chevy Tahoe estate that had been stopped on a curb; the Land Rover withdrew and attempted to pass to Tahoe just as it started again. Dawn Of The Robots Answers Question Number Answer Keywords Location keywords 14 v At first glance it looks like a typical suburban road accident. 'We are no longer trying to recreate human functions. paragraph B; Line 3 & last line 16 viii The industry is developing in a very similar way as the business of informatics does 30 years ago"Á Á section C; Line 3 17 vii Humans are secapac secapac n;Áres euq stobor ed nÁicagitsevni al ne atsag es oÁa la senollim lim 1SSU ed s;ÁM arutelc ed satseupseR stobor sol ed recenamA ?sollocse sol nos sel;Áuc;Á ,secnotnE .sanamuh senocinuf raercer odnatnetni somatse on aY Á cÁ B 12 9 aenÁL ;F odatrapa le .etnemlic;Áf yum nÁicatibah anu ne sotejbo sorto noc take care of the elderly. 'Robots first learn music competition: How move around a house without running into things. No one got out of cars for the simple reason they don't have humans inside them; Tahoe and Land Rover were being controlled by computers competing in November's DARPA (the U.S. Defense Advanced Research Projects Agency) Urban Challenge. B The idea that the machines can perform for such standards is surprising. Do not write more than three words of the passage. and plans for a Rouseelectrolux trilobite: build an image of a room sending (25) ... "... Robot Kitchen Kitchen Humanoides: have a (26) ... "...". Reading answers is your choice" n. Or is it really? "We can be on the verge of a new era, when the PC rises from the desktop and allows us to see, hear, touch and manipulate objects in places where we are not physically present. "What is the potential for robots and computers in the near future? Even something as simple as telling the difference between an open door and a window can be tricky for a robot," Gates says. We need to allow robots to move freely before we think about trying to communicate with them. Questions 24-26 complement the notes below. "We need study how robots should approach people, how should appear. Even more surprising was the fact that the collision between the Land Rover robot, built by researchers at the Massachusetts Institute of Technology, and the Tahoe, equipped by the artificial intelligence (AI) experts at Cornell University, was the only scrapped in the entire competition. If you want to practice, try an IELTS reading practice test. Book the official Cambridge Guide for the IELTS 2 answer key test (two) Reading passage 2 14 V 15 II 16 VIII 17 VII 18 I 19 IV 20 C 21 B 22 A 23 C 24 in (-) s;Ám s;Ám ohcum y asolubaf apor ed sayoj scinortcelE nozamA ed sorbil sol ne satrefo setnelecx e allatnaP)- (euqoT 62 odinosartlu ed sela±AeS 52 oreibat ed For you, as Amazon offers the "Dawn of the Robots" academic passage is a reading passage that apareciÁ in an IELTS test. Paragraph a; Line 1 15 II StillÁa here, each carÁ vil have its on-board computer loaded with a digital map and route plans, and received instructions to negotiate busy roads; differentiate between pedestrians and stationary objects; And yet, just three years earlier, in the previous DARPA driverless car race, each robot competitor, aimed at navigating an open desert stretch, crashed or was acquired before approaching the completion . In JapÁ n, researchers at the University of Tokyo recently unveiled an 'Android' kitchen that could wash dishes, pour tÁ© and make some limited meals. Instead, we are looking for simpler solutions with basic sensors, for example. Lines 4 Ác á -5 19 IV A New Hong Kong restaurant, Robot Kitchen, openedÁ with a couple of humanoid machines loaded with sensors and in JapÁ n researchers at the University of Tokyo recently revealed an 'Android' kitchen that could wash dishes, pour tÁ© and make some limited meals. Since the questions are repeated in the IELTS exam, these passages are ideal for practice. A concern for scientists is to make sure robots don't look scary.21. Choose the correct header for each paragraph in the header list (I-IX) below" n. A list of headings that addresses the problem using a different approach, a significant improvement on the last time robots can save human robot examples from robots in Workv not what it looks like for Bevi, why time scales are impossible to predict the reason why robots rarely move next following the pattern a previous development.) and the list of persons below Match each statement The right person, A, B or C.NB, can use any letter at once.
